

180° Awning

# OPENING

**Step 1 :** Open zip.

**Step 2 :** Flip the bag clear of the hinge.

**Step 3 :** Undo the three Velcro straps.

**Step 4 :** Grab all the arm ends and lift out of the cradle.

**Step 3 :** Grab the strap on the top arm and pull it with you as you walk to the rear of your vehicle. Make sure that bystanders keep clear!

**Step 4 :** Clip the strap onto the rail at the back of your vehicle.

**Step 5 :** Tighten the strap by pulling the loose end of the strap away from the cam buckle.

**Step 6 :** Raise the centre bar on the middle arm until it locks into place.

**Step 7 :** If required, drop the centre support leg. Loosen the thumb screw and then pull the support foot out of its housing.

**Step 8 :** With the foot of the centre support leg on the ground, raise the awning slightly, and tighten thumb screw on the pole.

**Step 9 :** If required, deploy the guy ropes from the awning arms.

### CLOSING

**Step 1 :** If the centre support leg was deployed, loosen its thumb screw and fold the leg up to the awning arm. To secure, slot the support foot into the cradle and then tighten the thumb screw.

**Step 2 :** Drop the centre bar on the middle arm until it lays flat.

**Step 3 :** Release the cam buckle on the strap at the rear of your vehicle and unhook.

**Step 4 :** Holding the strap, walk around to the front of your vehicle, to the front of the awning frame. Make sure that bystanders keep clear!

**Step 5 :** Push the awning arms flat against the awning frame.

**Step 6 :** Grab the two lower canvas folds and roll the canvas upwards.

**Step 7 :** When the third canvas fold is exposed, include it into the roll and carry on rolling upwards until the canvas roll is tight against the awning arms.

**Step 8 :** Secure the canvas tightly with the three Velcro straps.

**Step 9 :** Close the awning zip towards the rear of the vehicle.

#### NOTES :

Don't pack the awning away when it's wet.

Don't leave your awning unattended unless you've deployed the guy ropes.

While this unit handles the wind better than many awnings, we recommend that you deploy the guy ropes if the wind picks up. When in any doubt about the wind, we suggest that you use your guy ropes.
